

Font subset modes

Text cell in FreeSerif: the quick brown fox jumps over the lazy dog.

HTML cell in FreeSerif: regular and larger text.

SVG text in FreeSerif.

FreeSerif step	subset	expected
after insert(subset: true)	true	true
after addTextCell()	true	true
after addHTMLCell()	true	true
after addSVG()	true	true
FreeMono, insert(subset: false)	false	false

Check the embedded fonts with pdffonts: FreeSerif is listed as a subset (the name has a six-letter prefix and the "sub" column is "yes"), FreeMono is embedded whole.

FreeMono text, embedded whole.
